Test Purpose: Testing "הפרופיל שלי" page features.

Test Description: Check if edit profile functionality works as expected.

Test Run Information:

Tester Name: Ofir Vahav

Date of Test:

 11/1/2024

Prerequisites for this test:

Good internet , buy a course through the company , WIN 10 or higher
Software Versions:--

Application: https://www.hackampus.com/

Browser: Google chrome.

Operating System: WIN 11.

Required Configuration: browser setup and internet.

NOTES and RESULTS:

The "edit profile details" fields are open to type in and the "עדכן פרטים" button is displayed and clickable although students does not have the authority to update profile details.
I can guess that it's like that because "הפרופיל שלי" page is built the same for every user.

The fact that these fields and buttons are being displayed is very confusing and not understandable for students.
Another thing is that as we can see below from doing the tests, it creates a lot of bugs and despite the unauthority- details can be updated when using an Iphone.

Therefore I recommend changing this feature for student accounts to a page where their information is being displayed as a text, without any clickable fields or buttons.

Sanity negative Testing: Edit "שם פרטי" field.
Note- All of the fields beside password can not be updated.
